

DOCUMENT MANAGER SYSTEM

Software Quality Evaluation Questionnaire

Based on ISO/IEC 25010:2023 — Product Quality Model

Name (optional): _____

Office / Organization: _____

Role: ☐ System Admin ☐ Org Admin ☐ Co-Admin ☐ Staff ☐ Approver

Date: _____

Instructions: Please rate each statement about the Document Manager System by putting a check (✓) in the box that best reflects your experience, using the scale below.

4	Strongly Agree (SA) You fully agree	3	Agree (A) You agree	2	Disagree (D) You disagree	1	Strongly Disagree (SD) You fully disagree
----------	---	----------	-------------------------------	----------	-------------------------------------	----------	---

A. Functional Suitability — *functions meet stated and implied needs*

#	Statement	4	3	2	1
1	The system provides all the functions I need to manage documents (upload, share, approve, release, archive).				
2	The system performs its tasks correctly and produces accurate results (e.g., reference numbers, approval status).				
3	The system's functions are appropriate for accomplishing my document management tasks.				

B. Performance Efficiency — *performance relative to resources used*

#	Statement	4	3	2	1
4	The system responds quickly when I upload, search for, or open documents.				
5	The system runs smoothly without unnecessarily slowing down my device.				
6	The system handles many documents and users without noticeable performance problems.				

C. Compatibility — *works with other systems and shares its environment*

#	Statement	4	3	2	1
7	The system works well alongside other applications I use (e.g., browser, email).				
8	The system exchanges information properly with other services (e.g., email notifications).				

D. Interaction Capability — *formerly Usability: understandable, learnable, operable, engaging*

#	Statement	4	3	2	1
9	It is easy to tell that the system is suitable for my needs.				
10	I was able to learn how to use the system quickly.				
11	The system is easy to operate and navigate.				
12	The system helps me avoid and correct mistakes (e.g., confirmation dialogs before approving/rejecting).				
13	The interface is visually pleasant and engaging to use.				
14	The system is usable by different types of users, including those with little technical background.				
15	Help, labels, and guidance are available when I need them.				

E. Reliability — *performs its functions under specified conditions*

#	Statement	4	3	2	1
16	The system operates without frequent errors or crashes.				
17	The system is available whenever I need to use it.				
18	The system keeps working properly even when minor problems occur.				
19	The system recovers data and restores its state after an interruption or failure.				

F. Security — *protects information and grants access appropriately*

#	Statement	4	3	2	1
20	The system keeps documents confidential — only authorized people can access them.				
21	The system protects documents from unauthorized changes.				
22	The system accurately records who performed each action (e.g., who approved or released a document).				
23	The system properly verifies a user's identity before granting access.				

G. Maintainability — *can be modified and improved effectively*

#	Statement	4	3	2	1
24	The system's features are well-organized and clearly separated.				
25	When something goes wrong, the problem is easy to identify (e.g., clear error messages).				
26	Updates or changes to the system can be made without disrupting other parts.				

H. Flexibility — formerly Portability: adapts, scales, and transfers across environments					
#	Statement	4	3	2	1
27	The system adapts well to different devices and screen sizes (desktop, tablet, phone).				
28	The system continues to perform well as the number of documents and users grows.				
29	The system is easy to access and set up.				

I. Safety — new in ISO/IEC 25010:2023: avoids harm to people, data, or operations					
#	Statement	4	3	2	1
30	The system warns me before I perform risky or irreversible actions (e.g., deleting a document).				
31	The system prevents actions that could cause data loss (e.g., released papers must be archived before they can be deleted).				

Scoring & Interpretation (4-Point Scale)

Weighted Mean Range	Verbal Interpretation
3.26 – 4.00	Strongly Agree (Excellent)
2.51 – 3.25	Agree (Good / Acceptable)
1.76 – 2.50	Disagree (Needs Improvement)
1.00 – 1.75	Strongly Disagree (Poor)
